PROFESSIONAL SUMMARY

Frontend Engineer with 3.5+ years of experience architecting and shipping production web applications using React, Next.js (App Router) and TypeScript. Primary frontend engineer for creator monetization and streaming infrastructure serving 30K+ active users, processing 45K+ monthly transactions and 9.5K+ recurring subscriptions. Deep domain experience in real-time media streaming (HLS.js, WebRTC), client-side performance optimization (Core Web Vitals, DOM virtualization) and internal financial tooling. Proven track record of taking complex features independently from technical specification to automated CI/CD deployment.

TECHNICAL SKILLS

Languages: TypeScript, JavaScript (ES6+), HTML5, CSS3, SQL
Frontend Frameworks & Libraries: React 19/18, Next.js 14 (App Router, SSR, SSG), Angular, Redux Toolkit, TanStack Query, TanStack Virtual, TanStack Table, React Hook Form, React Router 7
UI & Styling: Tailwind CSS, Bootstrap, Radix UI, shadcn/ui, Material UI, Framer Motion, Responsive Design, Web Accessibility (WCAG 2.1)
Media & Real-Time: HLS.js (Adaptive Bitrate Streaming), LiveKit (WebRTC), Socket.IO, XMPP, Uppy / tus Resumable Protocol, WebSockets
Testing & Quality: Vitest, React Testing Library, Jest, Component Testing, End-to-End Testing Principles
Backend, Cloud & DevOps: Node.js, REST APIs, Vite, AWS (S3, CloudFront CDN, CodeBuild), Git, GitHub Actions, Amplitude Analytics
Developer Tools: Cursor, Claude Code, GitHub Copilot, Chrome DevTools Profiling, Postman

PROFESSIONAL EXPERIENCE

Ink In Caps — Mumbai, India

Software Development Engineer — Aug 2024 – Present
Junior Software Development Engineer — Aug 2023 – Jul 2024
Web Developer Intern — Jan 2023 – Jul 2023

Frontend engineer across three production web platforms for KNKY, a high-growth creator monetization ecosystem supporting 30K+ active users.

KNKY — Creator Monetization Platform (Flagship Application)

Tools: Next.js 14 (App Router), TypeScript, Redux Toolkit, TanStack Query/Virtual, Tailwind CSS, HLS.js, LiveKit, Vitest

- **Payment Infrastructure:** Architected frontend payment orchestration supporting 4 global payment methods (Tokenized Cards, iDEAL, Bancontact, Centrobill), implementing guest checkout flows, transaction retry handling and backend state recovery for 45K+ monthly transactions.
- **Subscription Management:** Engineered the subscription lifecycle module handling 9.5K+ subscription payments a month, covering tier upgrades, downgrades, automated trials, lifetime tiers, dynamic retention offer modals and tipping flows.
- **Media Streaming & Ingestion:** Built high-throughput Stories and Media Vault platform (20K+ monthly uploads), implementing direct-to-S3 resumable file uploads via Uppy and the tus protocol, paired with adaptive-bitrate HLS.js streaming optimized for mobile networks.
- **Real-Time Communication:** Integrated real-time WebRTC audio/video rooms via LiveKit and low-latency interactive messaging with Socket.IO/XMPP, engineered with background silent JWT token refresh and OTP 2FA authentication guards.
- **Performance Optimization:** Optimized mobile Core Web Vitals (LCP, INP) by dynamic-importing media libraries (hls.js), deferring Firebase SDK initialization and virtualizing extensive media vaults with TanStack Virtual to maintain consistent 60 FPS scrolling.
- **Testing & Quality:** Wrote unit and component tests with Vitest and React Testing Library and set repository-level coding and testing standards for the team's frontend work.

KNKY Admin Console (Internal Operations & Finance Platform)

Tools: React 19, React Router 7, TypeScript, Vite, Material UI, Material React Table, Redux Toolkit, AWS CodeBuild

- **Architecture Migration:** Spearheaded the migration of the internal operations console from Next.js/Webpack to a Vite-powered SPA, significantly accelerating local development HMR and halving staging/production build times on AWS CodeBuild.
- **Financial Tooling:** Built financial reconciliation and payout modules featuring server-side pagination, compound URL-persisted search parameters for shareable states and an asynchronous chunked CSV export preventing browser freezing on large datasets.
- **Access Control:** Engineered client-side Role-Based Access Control (RBAC), mapping granular server permissions to dynamic route navigation guards and UI component-level action barriers.

KNKY Agency Portal (B2B Multi-Tenant Dashboard)

Tools: React 18, Vite, TypeScript, Radix UI, Tailwind CSS, TanStack Virtual, React Hook Form, Axios

- **Creator Management:** Developed B2B creator management features, including invite workflows with configurable multi-tier revenue-share formulas, custom staff permissions and many-to-many talent-to-manager allocation.
- **Payload Decryption:** Architected automated AES payload decryption within Axios response interceptors, transparently handling encrypted API responses without modifying downstream component code.

ADDITIONAL PROJECTS & CONTRACT WORK

Heftyverse — Metaverse Platform | Frontend Engineer — 2023 – 2024

Tools: Angular, TypeScript, RxJS, Unity WebGL, Socket.IO, Stripe

- Engineered an Angular communication layer overlaying Unity 3D WebGL environments, implementing a bidirectional event bridge for real-time multiplayer chat, live leaderboard synchronization and Stripe checkout overlays.

EDUCATION

Master of Computer Applications (MCA) – Part-Time Sandip University, Nashik | CGPA: 7.85 — Aug 2023 – Jun 2026 (Completed)
Bachelor of Commerce (BCom) Yashwantrao Chavan Maharashtra Open University | 64% — Aug 2019 – Aug 2022
